## ProfiSeal Attends Kormarine Exhibition

**ProfiSeal will be attending the Kormarine exhibition in South Korea.**

The international marine, shipbuilding, offshore, oil and gas exhibition will be taking place on 22-25 October at BEXCO in Busan, South Korea.

KORMARINE, which held every two years in Busan, is a festival of people from shipbuilding and maritime industries all around the world. There are more than 900 exhibitors from 46 countries that will be showcasing maritime products to approximately 36,000 visitors from 80 countries.

ProfiSeal offers highly reliable propeller-shaft and bulkhead seals for the shipping industry. ProfiSeal propeller shaft seals are designed for shafts with diameters ranging from 20mm to 280mm, and are type-approved by DNV-GL, LR, BV, KR and ABS.

Besides that, ProfiSeal is the inventor of the first fire resistant bulk head seal A60, which fulfils the stronger IMO technical requirement for fire safety on board. The new development is nowadays used in RoRo, RoPax ferries, polar cruise ship, customs and coast guard patrol ships as well as in LPG barges and mid-size tankers.
